

#### Description

IberisData is one of the most complete B2B data sources of the Spanish market. The list is built from all companies creations registered in Spain, collected from the Spanish Trade Register, from the BORME (legal ads), and appended with phones via directories of all Spanish telecomm providers. Companies generic emails are also available.

#### Profile

Through the diversity of data collection sources, the IberisData database gathers the totality of Spanish companies, with the names of their administrators / managers. Names of decision-makers are also available.

#### Available selects

Geo, Activity (NACE), Employees size, HQ/ Branch, Legal form, creation date, job function...

#### **RECOMENDED USAGE**

**Because of its coverage and its selection possibilities, this database is adapted for any B2B offers, may it be to reach the largest audience, or to select a precise target. This list is also available for data appending, and clients' data analysis.**

#### Universe :

	3 150 000 companies 2 500 000 contacts
	3 150 000 phones
